

4-tert-Butylcatechol

CAS# 98-29-3

Applications

Antioxidant in the stabilization of food oils, fats, and other materials susceptible to oxidation.

Also used in the manufacture of rubber, polymers, and cosmetics.

Stabilizer in industrial processes, particularly in the prevention of polymer degradation during production and storage.

Specifications & Physical Properties

Appearance: white or yellowish flakes

Purity: 99.00% min.

Melting Point: 52-57°C

Ash Content: 0.10% max.

Storage

Corrosives area.

Keep containers tightly closed in a dry, cool and well-ventilated place.

Store under an inert atmosphere.

Protect from moisture.

Packaging

Typically packed in cardboard box or cardboard drum, or as required by the customer.
